Sec. 65.3 Requirement to submit new technical data.

A community's base flood elevations may increase or decrease
resulting from physical changes affecting flooding conditions. As soon
as practicable, but not later than six months after the date such

information becomes available, a community shall notify the Administrator of the changes by submitting technical or scientific data in accordance with this part. Such a submission is necessary so that upon confirmation of those physical changes affecting flooding conditions, risk premium rates and flood plain management requirements will be based upon current data.
